Philadelphia, Pa.

WIRING SYSTEM
—for lifetime service

The entire Buildings, 35, 37 and 39 N. Seventh Street and 629 and 631 Filbert Street, approximately 50,000 square feet of floor space, are used exclusively to carry on our business.

GENERAL INFORMATION AND TERMS

How to Order: We have assigned to each article listed a description, or number, which should always be used in ordering, or asking for quotations.

Shipments: Customers should send shipping instructions with all orders. Unless such information is clearly specified, we will use our own judgment in routing shipments. We maintain a traffic department that keeps thoroughly posted on all details connected with the most economical and speedy routing of shipments.

Parcel Post Insurance: Shipments made by parcel post will be insured against loss, unless customers instruct us otherwise. The usual insurance charge for this will be made on all shipments.

Liability: We exercise the utmost care in packing and shipping merchandise, and obtain proper receipts from the transportation companies. In case of loss or breakage, claim should be made on the transportation company, for we cannot be held responsible.

Return of Goods: Before returning goods, *be sure* and apply to us for shipping instructions. This assures the rendering of proper credit without delay. We are not responsible for goods returned without our permission.

All possible care is used to fill orders correctly, and we stand ready at all times to rectify mistakes that we make and without any expense to our customer. When the return of goods is made necessary for reasons beyond our control, a charge of not less than 10% will be made to cover the cost of handling, and Radio, wire and fixtures 20%.

Prices: All published prices are subject to market fluctuations and to change without notice.

Financial Standing: To avoid delay, purchasers with whom we have no account should accompany their first order with references, or if parcel post or express C. O. D. shipment, or sight draft, bill-of-lading shipment is desired, order should be accompanied by a deposit of 25% of the amount of the order.

Terms: To customers of approved credit our bills are payable in 30 days net, or subject to a cash discount on the following basis: Bills rendered from the 1st to the 15th of the month subject to cash discount if paid by the 25th, and those rendered from the 15th to the 30th of the month subject to cash discount if paid by the 10th of the following month

Mr. Arthur W. Miner,

Wm. Fowler Dick & Walker.,

Clean to Handle—Finished with high grade buff colored enamel that is clean to handle and will not chip off.

Well Packed—Both tubing and fittings packed in strong, neat cases that are easy to stock and to handle.

Costs Less—Costs less to buy and to install than any other surface raceway of like capacity.

WIRING SYSTEM
—for lifetime service

A few short years ago, a wiring job was just a wiring job to the average customer. All he wanted to know was, "How little can you do it for?" Price was the only yardstick men had to judge a job by—and to land a bid, the contractor had to cut prices and profits to the bone.

Now thousands of contractors are selling comfort, *convenience* and *quality* instead of price. They are landing bigger jobs—and at good profit. Two years of G-E Wiring System advertising have been teaching the public to demand complete wiring at a fair price, instead of a minimum job at a cut price.

Automatic Time Switches (Motor Operated)

Should be
Sold only
where Power
Companies
have
Regulated
Frequencies

Indoor Type T-8 Automatic Time Switch

Operation and Distinctive Features

These switches are unique in that the timekeeping and propelling member is a small synchronous motor. The motor keeps accurate time and moreover provides ample power to operate the switch mechanism reliably at all times. The combination of accurate time keeping with adequate power for reliable switch operation, together with the "no-winding" feature, places these switches in a class by themselves. Such achievements have been found in the very high-priced class of time switches. They are now offered in a very moderately priced line.

A small, inexpensive time switch embodying the prominent features of the larger switch, namely—*Accuracy, Reliability, and No Winding.*

THE ELECTRIC TIMEKEEPER

OBSERVATORY TIME

Direct from Your Light Current

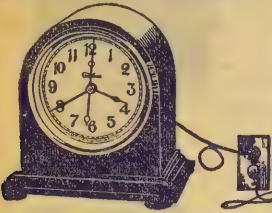

NO TEMPERAMENTAL SPRINGS
TO GO WRONG

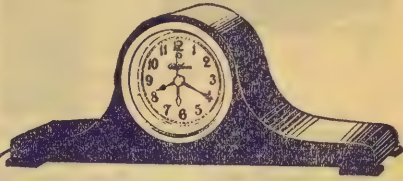

WALL MODEL

Oak, Mahogany or White
Enamel Finish

Should be sold only where Power Companies have Regulated Frequencies

GOTHIC TYPE—Mahogany Case

BOUDOIR MODEL—Mahogany Case

No other timekeeper can be built on the exclusive and decidedly unique principle of the Telechron. The Telechron is motor *driven* by a tiny synchronous motor, which receives its timing impulses *direct from the light current*, and once connected and set, it brings you Observatory Time.

The operation of the Telechron is marvelously simple.

There is no "clock" mechanism, no springs, no escapement, to cause trouble. Just the wonderful little motor which has been described by the Department Electrician of the New York City Police Department as "durable as an army mule!"

In short, the Telechron motor is electrically and mechanically correct,—just perfect for the timekeeping use to which it is put in many thousands of homes, offices and industrial plants the country over.

SKELETON FARADAY BELLS

Schedule E VIBRATING TYPE—MODEL "O" FOR BATTERY CIRCUITS

Skeleton Bells meet the requirements of a good signal gong with exposed mechanism; they are not as desirable as Enclosed Type shown on another page, but are still used in large quantities. Wound to any special resistance at standard list additions shown elsewhere in this catalog; also furnished Converted-Single-Stroke when specially ordered at \$2.50 net additional, but for important Single-Stroke work Multiple-Gear Single-Stroke Bells are recommended.

Heavy Duty Weatherproof Industrial Howlers

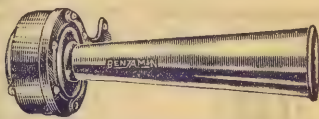

Benjamin Howlers have a distinctive, penetrating tone which commands attention. This tone makes them especially suitable for sounding calls and warnings in manufacturing locations. Sturdy and dependable with very low maintenance costs.

110 Volts is standard on all Benjamin D C Horns. However, any voltage from 6 to 250 may be specified at an advance of \$.50 list.

110 Volts, 60 cycles, is standard on all Benjamin A C Horns. However, any voltage from 6 to 250 and any frequency from 25 to 60 cycles may be specified at an advance of \$.50 list.

MOTOR DRIVEN INDUSTRIAL SIGNAL (For Multiple Circuits—110 Volts, 60 Cycles A.C.)

No. 8175

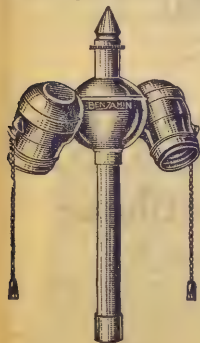

A weatherproof howler of remarkable carrying and penetrating power, for use in locations where a signal system must compete for attention with excessively loud manufacturing noises.

Has cast iron projector and body with angle bracket for mounting. Armature shaft bearings are oiled in assembly—cups are wick type and should not need attention for several years. 14-inch leads furnished for electrical connection.

Finish is baked black enamel.

Benjamin Stand Lamp Clusters

No. 890

Two Types—Wireless and Adjustable—both of which can be advantageously used in making floor lamps and table lamps, converting oil and gas lamps, or utilizing vases to make attractive stand lamps. Sockets are controlled individually. Electrical connections are easy to make.

The sockets of the adjustable cluster may be turned to any angle from vertical to horizontal, making it possible to have an invisible light source with a shallow lamp shade. With deeper shades, any angle of the lamps may be obtained to give the most desirable quality and direction of light.

Keeping pace with the growing interest in electric ventilation, we present another advanced idea to the Home Market—a built-in ILGAIR Ventilator—a weather-tight cabinet which the contractor can install at an extremely low cost. This new and improved built-in ILGAIR is a real innovation—recognized by every Architect, Builder, Jobber and Dealer who has seen it as a notable development in the progress of electric ventilation.

The new built-in type of the ILGAIR Electric Ventilator provides for permanent wall installation and can be installed at a surprisingly low cost. It comes complete—cabinet, fan, shutter and all necessary hardware. It is automatic in operation—open the door and the fan starts—quietly it exhausts the hot, depressive atmosphere, greasy fumes and cooking odors without any objectionable drafts. Close the door and the fan stops. The cost of operation is only a few cents a day. We would like to point out

to every electrical merchant that the day is here when no home is really modern without an ILGAIR Electric Ventilator and this new and improved built-in type offers increased money-making possibilities in the Home Market. We urge every

Dealer to
have an
ILGAIR
on display.

UTICA Electric Portable Furnace

Clean and Safe Electric Heat

—In Any Room

—At Any Time

Every home needs the Utica Electric Portable Furnace because it brings comfort to chilly rooms. It will be found exceptionally useful in spring and fall when the furnace is shut down. Excellent for the bathroom, the nursery or any other room where additional heat is needed to assure comfort.

The arrows indicate how the cool air is taken in at the base, then heated and forced out through top of heater into the room.

Heats the Entire Room

—Uses the Principle
of the Furnace

By its principle of air circulation—the same as is used in the warm air furnace—the Utica Electric Portable Furnace heats the entire room. Air is taken in through the sides and bottom of the heater and after being warmed, rises through the central air chamber out into the room.

Absolutely Safe—The sides and base are always cool. It is therefore safe around small children.

Models—Made in three models and 5 color combinations.

The NEW

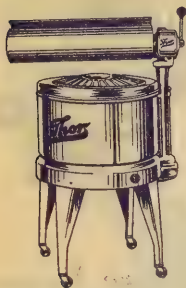

Thor

ROTARY IRONS

(Detachable Model)

Operates from the Wringer Shaft of
Thor-2, 6 and 8 Washing Machines

LIST PRICE, \$49.50

In Combination with
The New Thor-2
Agitator

No. Naught

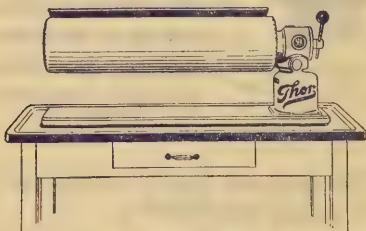

Only 26 inches long—yet will iron everything from smallest to largest pieces.

Portable—weighs about 25 lbs.—can be placed in kitchen drawer, corner, or closet. Heats up as quickly as the ordinary electric iron. Runs and heats from the electric lighting circuit.

Never miss a chance to sell a prospect for the Thor-2 Agitator this detachable unit, at the same time. It's the lowest cost washing and ironing machine combination. They will sell together as readily as one at a time, giving you extra profit without added overhead or sales expense.

No. 10 Thor Portable Rotary Iron

List Price \$79.50

Here is the model of this remarkable new invention that was built to finally clinch the entire Ironing Machine market for Thor Dealers.

Model No. 10, with base and enclosed General Electric motor, is for all homes which are not Thor users.

It is just as easy to move around as a Vacuum Cleaner—just as efficient as the No. Naught—just as sturdily built and finished.

It heats with exactly the same speed and operates from the electric lighting socket.

(Table not included in list price)

The New Thor-2 Agitator

A Low Priced Quality Washing Machine

Six Pounds Capacity

ADVANTAGES:

- 1.—Fewer parts than any washing machine on the market.
- 2.—Big capacity—compact in size. Requires only 24 square inches of floor space.
- 3.—Washes clothes cleaner.
- 4.—Washes clothes faster.
- 5.—Highest quality at lowest price in Thor history.
- 6.—Enamel lined tub that cannot rust, rot or corrode. Automatically cleans itself.
- 7.—Direct gear drive—no belts to slip and break.
- 8.—Unique rubber soft cushion roll wringer that won't break buttons—eliminates all old wringer troubles.
- 9.—General Electric motor.
- 10.—Beautiful East India Buff and Ebony Color Scheme

The New Thor-4 Cylinder Washer

6 Sheet Size, \$155.00 List

PROFESSIONAL TYPE—

Adopted Universally by Laundries and Dry Cleaners for its Time, Labor, and Garment-Saving Features

Another big high spot in the complete 1928 Thor line—the only complete line in the industry. As a Thor dealer, there isn't a washing machine prospect you can't meet, sell and satisfy.

Buss Lights

The 1929 Line of Buss Lights

No. 3141

The 1929 line of Buss Lights includes seven models with both metal and translucent shades. Bases in handsome Bronze, Ivory and Gun Metal finishes. The new translucent shades have the modern appeal. Widely different in design and color, they offer a range of choice for any taste, any use or any room.

No. 2002

Unlike an ordinary stand lamp, the Buss Light can be instantly converted into a clamp lamp or hang lamp. And both the bulb and the shade can be adjusted to focus the light wherever the reader wants it.

Buss Lights are popular sellers every season. They fill a definite need.

Net Prices to the Trade

Fancy [\$3.00 Retail] Buss Lights—Translucent or metal shade—packed 1 complete shade and base in a corrugated carton. Less than 12, \$2.10; 12 and over, \$2.00.

Plain [\$2.00 Retail] Buss Lights—Light Bronze Finish No. 2002. Less than 12, \$1.40; 12 and over, \$1.33.

No. 3242

Special 1929 Assortment with Display Material

Assortment gives you a complete stock of Buss Lights—one each of seven types (at the dozen price). You can fill a call for any Buss Light as advertised. Contains NEW TYPE Display Card that can be illuminated to help you sell Lights. You sell for \$20.00, costs you only **\$13.33**

Loxon Lamp Guards

"Loxon Protection Guards to Perfection"

It is practical economy to protect lamps with Loxons and especially since the advent of Mazda Lamps. Theft and breakage are total losses. Loxon prevents both and at single cost. All guards are well designed, heavily tinned, and made to fit lamps correctly.

2110, 2120, 2130, 2140

These enclosing units are used in schools, public buildings, stores and offices. Nos. 2110 and 2120 are used extensively in industrial lighting as well. Each unit consists of an upper reflector and lower refractor (diffusing). The lower opening is closed by inserting a removable glass diffusing cap, which permits quick lamp renewals.

FILTERLITE—INDIRECT

The Filterlite is the latest and most efficient enclosing unit of the indirect type. All the prismatic surfaces are on the inside. All outside surfaces are smooth. Depreciation due to dirt accumulation is reduced to a minimum.

Wire and socket included. Canopy with knockout for pull chain switch.

Standard finish Statuary Bronze.

X-Ray Window Units

"JACK" No. 400

"JILL" No. 410

For 150 Watt Mazda Lamp. Holder FREE.

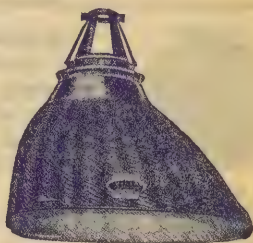

"Jack" No. 400 is the newly developed X-Ray Reflector for the 150-watt lamp. Can also be used with 100-watt lamp. It is a "high-trim" reflector for *deep* windows.

For 150 Watt Mazda Lamp. Holder FREE.

"Jill" No. 410 is the semi-concentrating X-Ray Reflector also recently developed for the 150-watt Mazda lamp. Can be used with 100-watt lamp. For *shallow*, "low-trim" windows.

"KING" No. 500

"QUEEN" No. 510

For 200 Watt Mazda Lamp. Holder FREE.

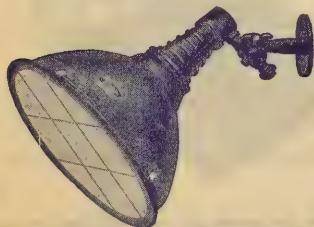

"King" No. 500 is another new X-Ray development for the 200-watt Mazda lamp. Suited to large windows with *deep* background and high ceiling.

For 200 Watt Mazda Lamp. Holder FREE.

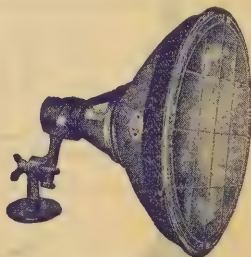

"Queen" No. 510 is the semi-concentrating 200-watt size.

"Queen" should be used in large windows that are *shallow* but have high ceilings.

Cat. No.	List	Less than \$10.00 List	\$10.00 List or over	Std. Pkg.
400	\$4.50	\$3.44	\$3.24	\$3.04

510	6.00	4.59	4.32	4.05

"FLOOD RAY" No. 33

"HIPPO" No. 88

The X-Ray window flood-light may be used in large or small windows whether or not other lighting is available. For the intense "high-lighting" effects necessary where elimination of reflection in the plate glass during daylight hours is desired, use X-Ray No. 88 "Hippo" with 500-watt Mazda lamp. Color equipment supplied if desired.

Where it is necessary to employ more than a single light source to secure the proper flexibility, use No. 33 Window Flood-lights which may be equipped with Color Mediums (red, blue, green, amber) and use the 200-watt Mazda "C" lamp.

Cat. No.	List	Dealer Net
33 with color equipment	\$12.00	\$8.10
33 without color equipment	10.00	6.75

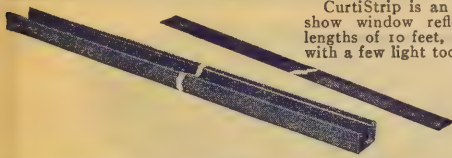

Send sketches with details and we will be pleased to make recommendations for correct window lighting.

A Standardized

X-Ray CurtiStrip

Wiring Device

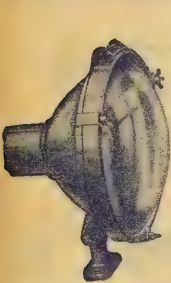

CURTISTRIP AND X-RAYLETS

CurtiStrip is an approved wiring device for all show window reflectors. It comes in standard lengths of 10 feet, and may be cut and assembled with a few light tools right on the job, with a 50% saving in time and material costs. The standardized parts are named X-Raylets. They are simple, yet provide exceptional facility for every type of assembly. CurtiStrip is useful for all purposes where a neat, rigid, perfectly aligned wireway giving good electrical conductivity is required.

X-RAY FLOODLIGHTING PROJECTORS

X-Ray Projectors are heavy gauge, galvanized steel units for spectacular, protective and night construction floodlighting.

Nos. 60 and 91 have swivel bases, lamp focus adjustments and are weather-proof. Finished in battleship gray. Clear heating-resist cover glass furnished unless otherwise specified.

No. 25 "Star", also of heavy gauge steel, has a double control base and simple lamp focusing device. Clear, deep-bowed, heat-resisting cover presses into cork gasket around housing making it watertight. Housing treated with rust resisting cadmium finish. No. 205 is a copper projector of the same construction.

Diffusing and color lenses are available for X-Ray projectors at slight extra cost.

*Floodlighting lamps are not to be burned within an angle of 45 degrees base up.

X-RAY INDUSTRIAL REFLECTOR

X-Ray Industrial Reflectors are blown in one piece from very tough glass of the highest quality obtainable, each size designed for a certain sized lamp. They are moulded in a double series of radial and spiral corrugations to break up streaks and shadows. With the exception of No. 590, X-Ray Industrial Reflectors give a wide spread of light for all kinds of interior lighting, — from localized lighting over work benches, machines, tables counters, etc., to general lighting of large interiors such as factories, mills, foundries, warehouses, gymnasiums, armories, etc. No. 590 "Big Boy" is a large, powerful reflector of a more concentrating type, also for large interiors. No. 580 is provided with a special holder. Nos. 54 and 590 include a special holder and receptacle.

Benjamin Products

Show Case Lighting Fixtures

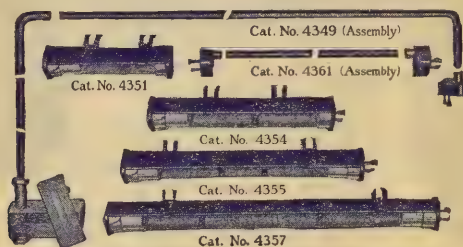

Here it is

Easily installed in any show case—straight or curved—because of sectional construction and variety of lengths. Two screws at each joint furnish means of electrical and mechanical connections. These fixtures give even distribution of light over entire display. Lamps can be changed without disturbing contents of case. Will conform with most rigid inspection rules.

Standard finish for parts listed is dark bronze outside; lamp sections are aluminized inside.

Lamp Sections

Lamp sections are completely wired for "through" connection and take T-10 tubular lamps.

Christmas Tree Holders

No. 170 Noma Tree Stand

An 8-Light Series Tree Holder for 110-120 Volts
Without Lamp

Decorated to give the effect of snow surrounding the tree, with a wreath of colorful poinsettias and holly, set off by lamps for the eight sockets. It is equipped with a parallel leader cord and plug which controls the eight lamps on the holder. There is also an outlet on the side of the tree holder into which can be inserted the plug controlling the other lamps on the tree.

List Price (less lamps)	each	\$6.50
Less than 5	each net	3.65
5 and over	each net	3.28

Packed in individual cartons—5 cartons to a standard package.

No. 175 Noma Special Tree Holder

This is a tree stand for which we have found that there is a great need, one that is practical in every way. As you can see, it is equipped with an attractive little fence all around it, already wired with sockets into which eight lights can be placed, lighting up the usually darkest part of the tree into a beautifully ornamental base. The inside basin can be filled with 20-lbs. of water. This will insure a solid base as well as keep the tree moist for nearly a week and in that way prolong the life and prevent the usual annoyance of the shedding of tree needles.

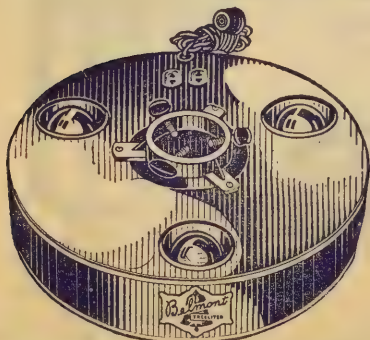

Equipped with a parallel leader cord, also an extension device which permits the insertion of the plug controlling the other lights on the tree.

List Price (less lamps)	each	\$5.25
Less than 5	each net	2.97
5 and over	each net	2.84

Packed in individual cartons—5 cartons to a standard package.

Belmont Treeliter

Constructed of heavy cast metal, durably and beautifully decorated with red poinsettia flowers and green holly leaves on white snow background, producing an enchanting scintillating effect when illuminated. Size 14" diameter by 6" high. Weight, 15 lbs.

List price (less lamps)	each	\$6.50
Less than 5	each net	4.20
5 and over	each net	3.85

Packed in individual cartons—5 cartons to a standard package.

No. 3500 Noma Twinkling Multiple Outfit

Price \$6.50

A NOMA 7-light Twinkling Multiple Set, weather-proof throughout; bakelite sockets; perfectly insulated; equipped with a tri-plug attachment with cap and base so that another set can be snapped into it.

The Twinkling device is made by the General Electric Co. for us exclusively, under patents we own and control; is of bakelite and has a double switch, permitting either twinkling of lamps or a steady light, as desired.

The sockets on this outfit are 18 inches apart, with a 6-foot leader wire and an overall length of 16 feet.

No. 3600 Noma Twinkling Multiple Outfit
Price \$19.00

This outfit is similar to the above in every detail but is equipped with 20 Mazda Lights.

The sockets on this outfit are 18 inches apart, with a 6-foot leader wire and an overall length of 35 feet.

No. 1000 Noma Wreath

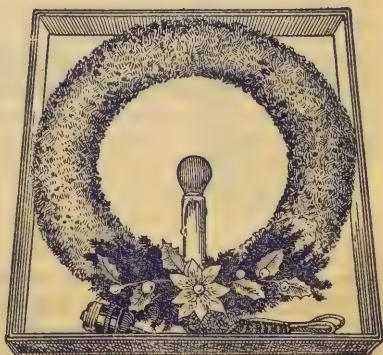

Price \$2.00

Including Mazda Lamp for 110-120 Volts

A Noma 12-inch Christmas Wreath made on a full-round frame covered with a high grade red wood-chenille roping. The beautiful decoration at the bottom of the candle consists of natural pine branches, chemically prepared, and holly leaves with berries, centered by a silver poinsettia. The candle shaft is sprayed in silver and green with dript effect.

This wreath is equipped with an intermediate base Mazda Tungsten lamp.

Can also be furnished with 32-volt lamp at same price. Our No. 1000-32V.

Woods Waxer

- A—Reservoir
 B—Screws to adjust flow of wax.
 C—Brushes
 D—Rubber Band to protect furniture.
 E—Comfortable grip to fit the hand
 F—Trigger switch

Simply pour in the wax—the brushes do the rest

The Woods Waxer is so light and so easy to handle that even a child can use it (weighs only 14 lbs.). You simply fill the reservoir with wax, adjust the thumb screws to give the flow you wish and guide the machine over the floor. The wax is applied smoothly, evenly and without effort. Then, by merely changing the brushes, you polish the floors to a beautiful, lustrous finish that preserves them against wear and makes them easier to keep clean.

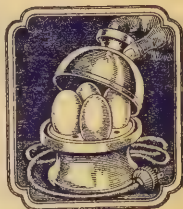

List Price \$75.00
